Pour ce pratique je devais créer une machine virtuelle avec l'une des distributions d'Ubuntu, apprendre a installer un OS.

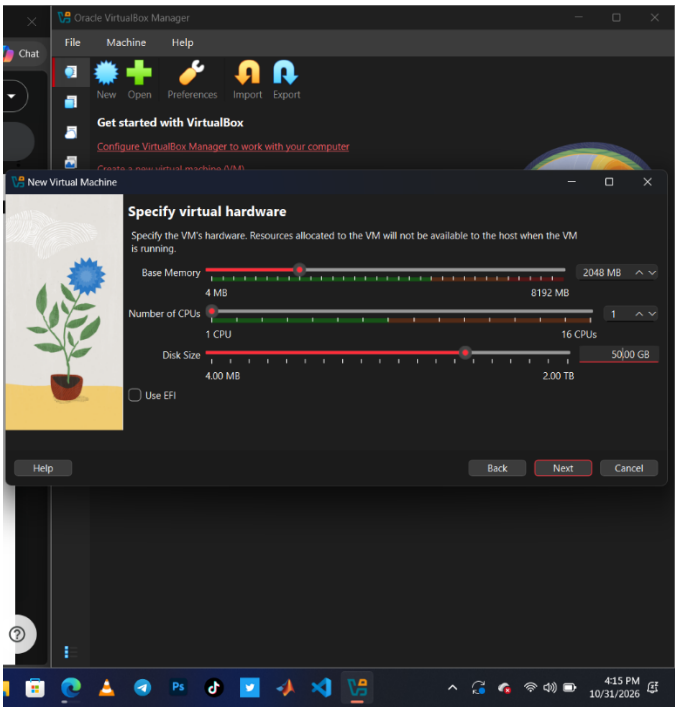

Pour effectuer ce TP, j'ai utilisé Virtual box pour la création de la machine virtuelle, téléchargé une distribution d'Ubuntu.

2- Lancement et Installation de la machine virtuelle

3- Accéder au VM

4- Conclusion

Dans ce TP, j'ai appris à installer un OS spécialement Ubuntu.

Pour réaliser ce tâche j'ai dû chercher la distribution compatible à mon VM, faire preuve de patience et appliquer ce que j'ai appris en cours.
